

Trimod'Besta

Solutions for Shipbuilding and the
Marine Industry

Shipbuilding market

Since 1967 the Shipbuilding industry trusts the unique Trimod Besta level switches. Today, hundreds of thousands are installed on cargo vessels, tankers, cruise ships, fregattes, nuclear submarines, catamarans, crane- and container ships.

Electric and pneumatic level switches are available to the marine industry, in light, heavy duty and explosion proof versions.

The 3-modular concept offers an unlimited variety of switches

Shipbuilding market

The simplest method of installing any Trimod Besta switches is to use our standard weld-on counterflanges.

Counterflange

not for use with the test actuator

Type 2829.1 & 2831.3

Type 2829.1V80 & 2831.3V80

Type	Flange length	Flange material	Stud material	Stud length
2829.1	V = 38 mm	P250GH	5.8	30 mm
2831.3	V = 38 mm	1.4404	A2	30 mm
2829.1V80*	V = 80 mm	P250GH	5.8	30 mm
2831.3V80*	V = 80 mm	1.4404	A2	30 mm

***Important:** Not for use in applications on top of the tank.

Counterflange

for use with the test actuator (type 2382 & 2383)

Type 2829.2 & 2831.4

Type 2829.2V80 & 2831.4V80

Type	Flange length	Flange material	Stud material	Stud length
2829.2	V = 38 mm	P250GH	5.8	70 mm
2831.4	V = 38 mm	1.4404	A2	70 mm
2829.2V80*	V = 80 mm	P250GH	5.8	70 mm
2831.4V80*	V = 80 mm	1.4404	A2	70 mm

***Important:** Not for use in applications on top of the tank.

Test actuator

The test actuator allows a periodic manual function check of the level switch in operating status. The following functions can be tested; function of the switching element (micro-switch, proximity switch, pneumatic valve) and movement of the float.

Important: Not for use with the Compact Switch.

Type	Material	O-Ring	Temperature range	Operating pressure
2382	CrNiMo	FPM	0 to 150°C	-1 to 25 bar
2383	CrNiMo	EPDM	-30 to 150°C	-1 to 25 bar
